PERSONAL DETAILS

Current Location	Bengaluru
Date of birth	July 2, 2006
Gender	Female

EDUCATION

Graduation	B.Tech/B.E. (Computer Science Engineering) Sapthagiri College of Engineering, Bangalore with Score 8.9%
Class XII	Karnataka with 91.13% in 2024
Class X	Karnataka with 96% in 2024
Certification Course	Artificial Intelligence (May 2025 - Present)

INTERNSHIPS AND PROJECTS

Internships	Elevate (Duration May 2025 - June 2025) Completed AI/ML internship at Elevate Labs under Skill India & MSME. Worked on real-world projects, improved debugging skills, implemented AI/ML models, optimized code, and published weekly tasks on GitHub. Awarded Best Performer for exceptional problem-solving and analytical skills.
Projects	Gesture Domotics - Smart Appliance Control (Duration June 2025 - July 2025) Gesture Domotics is a smart home automation project designed to control household appliances such as lights, fans, and chargers using simple hand gestures. The system uses a webcam to capture real-time video, and gesture recognition is implemented using Python and OpenCV. Recognized gestures are processed and sent to an Arduino, which is connected to a 3-channel relay module to switch appliances on or off. This project eliminates the need for physical switches, offering a touchless and convenient solution, especially useful for people with mobility limitations. My role included designing the system architecture, writing the gesture detection code, integrating hardware components, and ensuring smooth communication between software and hardware. Through this project, I gained hands-on experience in Python programming, computer vision, hardware interfacing, and real-time system integration, making it a strong example of combining AI concepts with IoT applications.

SKILLS AND ACHIEVEMENTS

Skills	Python Programmer,C Programming Language,DSA,Microsoft Exchange and Office 5,Communication Skills,Teamwork,Time Management,Critical Thinking
Language	English (Both), Kannada (Both), Hindi (Read/Write)
